

```
// Interfaz para operaciones de lectura de empleados
```

```
public interface EmployeeReader {  
    List<Employee> getAllEmployees();  
    Employee getEmployeeById(int id);  
}
```

```
// Interfaz para operaciones de escritura de empleados
```

```
public interface EmployeeWriter {  
    void addEmployee(Employee employee);  
    void updateEmployee(Employee employee);  
    void deleteEmployee(Employee employee);  
}
```

```
// Interfaz combinada para todas las operaciones de empleados
```

```
public interface EmployeeRepository extends EmployeeReader, EmployeeWriter {  
}
```
